About Us

Fedri consultancy Services is a Service and Consulting Company for the development of Information Technology. We're satisfying our clients by fulfilling their requirements from last 7 years by giving the outstanding performance in Designing and development of the Websites, Software's and Mobile Applications. We've got the great teams of experts with huge experience in understanding the user and search engine needs

We have experts in many computer languages and we're assigning them as per the requirements. We have huge experience in understanding the requirement of Domestic and Commercial projects. We work in many ranges of technologies and we're capable of doing all of your IT requirements. Our great support and guarantees of the application will never let you face any problem even after the project hand over.

Upon assigning the project, our clients have many benefits to check the status of the progress. All the progress tracking can be done with a single “**Unique ID**” which they have to enter on our website and they'll get all the details of the progress.

As we have global clients, we made many advanced options in our website to make them aware of the job we're doing. They can view all the details of the projects starting from the bidding till the handover including the payment information.

We have all digitally signed documents for the projects. Our clients can authenticate any documents using with only one “**Unique ID**”. Once the project completes, they have the option to rate our services which appear to our website visitors. Thanks for our experts who made a very easy platform to satisfy our clients.

Design & Development of Website

The websites we made is coded by us from the scrap and our codes are written in a highly professional and understandable way. We work for almost all web based application, database-driven systems, mapping and geo-spatial applications, and large content managed websites. Our designed websites are highly professional, secure and user friendly. We know how to make your business visible in the global market. We're so experience in designing the website; just we need the company profile to complete the job.

We work for both the available types of website called Static and Dynamic. We develop full responsive website which will work on all the screen size like Mobile, Tablets or the Computer Screen. We always update our self to use the latest framework to develop the responsive layout. We develop Multilanguage website which a user can switch as per their understanding.

We develop many huge database website which had many different rules for every admins. Our design websites are very easy to understand for any skilled person. Once we develop, we trained our clients to use the website and we're always there to support them for any queries.

From the past few years when we starts for windows based application, we have reached to the top in satisfying the clients in developing the software for their official purposes. We build all types of windows based application required for your business purpose. We than guide and trained the employees to use the application.

Design & Development of Software

Our every software will be thoroughly tested by our software tester to check for any bugs in it. Once its confirm the application is bugs free, we'll present to client for review.

Our software's are highly professional and very user friendly. We have great team to understand the requirement of your business to build the application. We develop the application to use in a single system or multiple systems using the available connection.

Not even this, we'll setup and train the clients to use our application and to use the supporting database. Plus, we're providing them one years of free maintenance for any of our product they use.

Design & Development of Mobile Apps

The necessary of the Mobile Apps are increasing as most of the user want to access their website, application using mobile or tablets. We develop Apps for Android and IOS as per your requirement. Our applications are very light in size, easy to access, lower consumption of battery and internet. We'll make the apps and upload in the respective store either google play or IOS

Our mobile application connects your backend database of the business to mobile. It will connect seamlessly so the user comfortable accessing your information.

We develop user friendly mobile application which will be available to tablets and iPad as well.

The major requirement of any website is to maintain after the development. Our maintenance covers many benefits and experts advices. We'll manage all the load of the website and we'll update it as per the client's requirements. We maintain both Static and Dynamic website.

Management & Maintenance of **Website**

Maintenance of the website also contains the Email management where we'll handle all the company mailing issues. Not only this, it's also containing the management of the Server, for any issue relates to bandwidth or server shutdown.

Our team knows how to handle the website professionally and how to modify the codes of the existing website.

Registration & Hosting of **Website**

The initial step to make your business visible globally is to assign a website name to it called the Domain Name and the place where your website files stored is called the Hosting Server. Whenever we buy the domain name or host the website file, we only consider the world top server from where you can get the friendly support even if you deal with them personally.

Upon handover the website, we are not only providing the Cpanel Authentication but we're also giving away the higher admin Authentication. By using the higher admin credentials, you can provide to any of your developer to future updates if you don't want to carry with us.

We're always supporting you for any queries you have. You can consult any of our support team for any query you have. We're always happy to answer you.
